10.12.20

It has come to our attention that there are two different gaskets for the sanitary traps ST11 & 180220.

This is indicated below, the cross section views show the differences in their profile.

They are NOT interchangeable.

ST22 is **ONLY** compatible with the original Dairy Spares sanitary traps ST11 & ST02 the sides of their lids are slightly conical in profile. The ST22 is profiled to suit.

180222 is the replacement gasket for 180220 Vaccar sanitary trap. The lids are parallel sided and the gasket is L shaped in profile to suit.
